Mr komolesh Sharma is a small farmer with 50 dcml lands. He lives with his wife and son in a village named Kurulia which is 6 kilometers away from Kaligonj. Agriculture is his only income source. He couldn't bear the educational cost of his two children, so gave marriage his daughter without higher study. He was worried about the cost of rice production.

Then he joined the WEAP farmers' committee and became the President of the group. He received training from this project on AWD techniques, know-how to minimize crop production cost and efficient use of irrigation water reservoir. He is always active in group discussion, Apex meeting and sincere in communicating fellow farmers. By receiving training, his mindset changed to certain extent, followed AWD technique and reduced water scheduling from 85days to 60days for Boro rice production and irrigation cost saving by an avg. BDT 2,000. At the same time, crop yield increased by 2 maunds. Yet the cost of production can be reduced further if fertilizers and insecticide cost are minimized. He will do it gradually.

Mr. Sharma is happy as he got 126% higher profit now than before. At the same time he believes that he saves environment

### Case Study of WEAP Farmer: Two

#### About the Farmer:

Name	Md Nurul Islam
Village	Mostobapur
Union	Niamatpur
Thana	Kaliganj
District	Jhenaidah
Farmers ID	171

Md. Nurul Islam

Md Nurul Islam is a farmer who owns 80 dcml lands. He lives in a small village which is 7 km away from the Upazila with 4 family members. He is very popular to other villages for his philanthropic activity. But he had no enough source of income except agriculture. However, he couldn't produce sufficient amount of foods from his lands and it feels unconfutable and gets indebted with loan from micro credit.

He joined Water-use Efficient Agriculture project committee in 2018 and gathered knowledge about AWD technique, vermicomposting and cropping pattern as well as profitable agriculture. He started using vermicompost instead of chemical fertilizer and decided to cultivate Rabi crops by changing rice-rice cropping pattern.

Last year, in Rabi season, he cultivated one Rabi crop (Lentil) in his 80-decimal lands and had the following particulars of income-expenditure.

#### 👉 Rice production including income and expenditure in 80 dcml lands

Expenditure		Income
Seed	2424	Total Rice Produced = 55 Maunds
Irrigation	11103	
Fertilizer	11995	Sale price of 55 Maunds rice = (BDT @ 55 x 1,000 BDT) BDT 55,000
Insecticide	2424	
Labor	5018	Profit = (55,000-32,964) = <b>BDT. 22,036</b>
Total	32964	

#### 👍 Rabi Crop in 80 decimal lands

Expenditure		Income
Seed	950	Total Lentil production = 680 kg (17 Maunds)
Irrigation	2400	
Fertilizer	1500	Sale price of 360kg Lentil = (@680*115) = <b>BDT 78,200</b>
Insecticide	1450	
Labor	2000	Profit = (78,200-8,300) = <b>69,900 BDT</b>
Total	8,300	

Md. Nurul got 317% higher profit in Rabi cultivation than that of rice and he is happy too. Now, he wants to cultivate betel leaf with vermicompost which is more profitable than rice. He contributes to his society in many ways including social mediation, marriage ceremony and donation to poor people in needs.

### Case Study of WEAP Farmer: Three

#### About Farmer:

Name	Md Afzal Hossen
Village	Alaipur
Union	Sundorpur Durgapur
Thana	Kaliganj
District	Jhenaidah
Farmers ID	87

Md. Afjal Hossein

Md Afzal Hossein is a WEAP farmer who owns 300 decimal lands. He lived in Alaipur, which is 5 km away from the Kaliganj Upazila. Most of the lands of his village is low, so Rice is the main crop of that area. Many people depend on agriculture here, Mr Afzal has no income source except agriculture, but he couldn't get enough profit from it because of high input production cost. In 2018, he joined WEAP project. When SBF formed groups in Alaipur, everybody selected him as the President of farmers' apex committee for his honesty, sincerity and devotion. Then he took part in some training such as- seed training, WEAP training, and GAP training. He acquired knowledge about the efficient use of water in Agriculture. Digging small pond (Reservoir) is one of the ways of efficient use of water and by this pond he was able to save cost of irrigation. As he received seed management training from SBF, he became interested to produce and preserve the seeds, multiply seeds for his own lands and to get more sale proceeds than paddy. In the following season, (last year), he cultivated one Rabi crop (Lentil) in his 30-decimal land and had the following particulars of income-expenditure.

#### Paddy sold as food

Paddy Production	Production Cost per Maund	Sale Price per Maund
1 Maund paddy	BDT@750	BDT@1,000
Total Paddy produced= 30 Maunds	30*750=22,500	30*1000=30,000
<b>Total profit = BDT (30,000-22,500) = BDT 7,500</b>		

#### 👍 Paddy sold as seed

Paddy Production	Production Cost per Maund	Sale Price per Maund
1 Maund paddy	BDT@750	BDT@1,000
Total seed produced= 20 Maunds	750*20=15,000	20mds (800 kg*@55/kg =BDT. 44,000
Paddy as food produced=10 Maund		
Remaining paddy (as food) 10 mds	750*10= 7,500	10* 1000=10,000 BDT
Seed cost saving for Irrigation	0	600 BDT
Total Cost of production = (15000+7500)= BDT. 22,500		
Total Price = (44,000+10,000)		54,600
<b>Total Profit = (54,000-22,500)</b>		<b>BDT. 31,500</b>

Mr Afjal Hossein got 420% higher profit in rice-as-seed than rice-as-food. Additionally, he saves irrigation cost amounting to BDT.600 and has started producing seeds commercially. He saved his seed cost for boro and aman season, he gets healthy benefits from the seed sale to the farmers and market. Afjal Hossein has become seed para-trainer, he disseminates the seed production knowledge and WEAP knowledge as well in the locality

Md. Nasir Mondol

Md Nasir Mondol is a farmer who owns 184 decimal lands at different parcels. He lives in Mohadebpur village, 3 km away from Kaliganj Upazila. He has 5 family members; two sons and one girl are studying. He is the only earning member of his family. He joined WEAP in 2018. He is the president of his village WEAP committee; He is involved in many social activities. He received WEAP and GAP training from Sonar Bangla Foundation.

He used to cultivate Boro paddy, but didn't get proper amount of crop from his lands and the soil condition was going bad day by day as well as crop productivity. When he learned the benefits soil test, his one parcel having 25 decimal lands was tested. He then followed through recommended doses of fertilizer for his lands. Last year, in Rabi season, he cultivated one Rabi crop (Lentil) in his 25 decimal lands and had the following particulars of income and expenditure.

Md. Nasir Mondol was benefitted from soil test and in term of monetary value BDT 2,500 due to follow recommended doses of fertilizers. Now, his is interested to have their remaining lands tested to improve soil health and sustain crop productivity. He also shared his experiences with non-target farmers.

### Case Study of WEAP Farmer: Five

#### About Farmer:

Name	Md Mominur Rahman
Village	Komlapur
Union	Sundorpur Durgapur
Thana	Kaliganj
District	Jhenaidah
Farmers ID	98

Md. Mominur Rahman

Md. Mominur Rahman is a WEAP farmer who owns 110 decimal lands. He has 2 children. Agriculture is the only income source for his family. While asked, he said he had been losing interest in agriculture due to high production cost as well as irrigation cost.

In April 2018, he engaged himself with WEAP project. He was nominated as the vice president of village WEAP committee. He received training on WEAP, GAP and seed production. He was always active in WEAP activities. He acquired knowledge on how to irrigate lands efficiently and as such, wanted to dig water reservoir, a small pond at field corner thereby saved irrigation cost in 46 decimal lands for Boro and Aman.

With the reservoir, he used to irrigate Boro paddy and reduced 20 times schedule of using underground water and saved cost of irrigation by the contract. He also used water from reservoir to irrigate 8 times in Aman paddy for seedbed preparation and supplementary irrigation. This saved groundwater.

Rice production in 46 decimals without before digging of reservoir

Expenditure				Income
	Boro	Aman	Total	
Seed	550	380	930	Total Rice Produced <b>33</b> Maunds
Irrigation	2000	1200	3200	
Fertilizer	2830	2770	5600	
Insecticide	2700	1700	4400	
Labor	6100	6100	12200	
<b>Total</b>	<b>14,180</b>	<b>12,150</b>	<b>26,330</b>	Sale price of <b>33</b> Maunds Rice = (BDT @ <b>1,000</b> x33) = <b>BDT 33,000</b>
				Profit = (33,000 -26330) = <b>BDT 6,670</b>

#### 👍 Rice production in 46 decimals with water reservoir

Rice Expenditure				Rice Income
	Boro	Aman	Total	
Seed	550	380	930	Total Rice Produced <b>35</b> Maunds
Irrigation	1104	0	3200	
Fertilizer	2830	2770	5600	
Insecticide	2700	1700	4400	
Labor	5600	5000	12200	
<b>Total</b>	<b>12784</b>	<b>9850</b>	<b>22634</b>	Sale price of <b>35</b> Maunds rice = BDT @ <b>1000</b> x35 = <b>BDT 35,000</b>
				Profit = (35,000 -22634) = <b>BDT 12,366</b>

Mr. Rahman got almost double the amount of profit from by digging water reservoir. He is now interested to dig a new pond by his own cost. He is very happy to have income balance as well as less use of underground water. In second year, he also received profit margin of BDT 5,696 from one land parcel. He wants to increase Rabi crop cultivate and communicated Upazila Agriculture office for seed support through WEAP.

## Case Study of WEAP Farmer: Six

### About the Farmer:

Name	Ms. Rojina Akter
Village	Mostabapur
Union	Niamatpur
Thana	Kaliganj
District	Jhenaidah
Farmers ID	108

Ms. Rojina Akter

### Rice (Boro) expenditure and income in 33 decimal lands:

Rice Expenditure		Rice Income	
Seed	500	Total Rice Produced 25 Maunds	
Irrigation	6000		
Fertilizer	4000	Sale Price of 25Maunds rice = (BDT @ 720x 25	
Insecticide	800	BDT 18,000	
Labor	5000	Profit = (18000-16300) = BDT 1,700	
Total	16300 BDT		

Ms. Rojina Akter is a very small farmer, she has 33 decimal lands. She lives with his husband and only daughter (Class- 4). Her husband is a daily labor and he was the only earning member of her family but he couldn't maintain the family with his earnings. Day by day, they were getting indebted. She was interested to join WEAP farmers' committee. She was interested for vermicomposting and as such SBF supported Redworm. She then started producing vermicompost in 2018 as well as multiplying Redworms. Initially, she started producing vermicompost with two containers, now she produces vermicompost with 40 containers. By producing vermicompost, she is using it for her own land and selling it to non-target farmers and increasing income day by day.

### Initial Cost of Vermicompost, Red worm and instruments:

Instruments	Cost
2 pots	50*2= BDT 100
Shade	24*2=480
<b>Total = 100+ 480 = BDT 580</b>	

### Income from Vermicompost and Redworm

Vermicompost	Amount (Kg)	BDT	Red worm	Amount	Price
Self-use in land	100	1,000	Started with	1kg	1,000
Sell to others	500	5,000	Multiplied	9kg	9000
Total Produced	600	6,000	Total	10kg	10,000
<b>Total Income 6,000 BDT + 10,000 BDT = 16,000</b>					
<b>Profit = 16,000 – 580 = BDT 15,420</b>					

Now, Rojina Akter is a leader of vermicompost producers of Mostabapur village farmers' Committee. She shares her knowledge with others in various meeting and discussion. She also minimizes the cost of rice production by using vermicompost in this year. With income balance from vermicompost as fertilizer and irrigation cost saving, Rojina is happy with her family.
